

SAFETY DATA SHEET

according to Regulation (EC) No.1907/2006

SANICARRIER

Version 1 - Revision: 01.07.2022 - page 1 of 7

1. IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY UNDERTAKING

Product identifier

Trade name: SaniCarrier
Product description: Propylene glycol solution
Other identifiers: -

Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses: Surfactant solution for producing fog and ULV misting solutions.
Uses advised against: No specific uses advised against are identified.

Details of the supplier of the safety data sheet

Manufacturer/ Name: DF Trading CC
Supplier Address: 110, Ravel Street - Theoville AH, Vanderbijlpark - 1911, South Africa
Telephone: +27 16 987 7777
E-mail: info@dynafogafrica.co.za

Emergency telephone number

South Africa Health Emergency: +27 086 155 5777 (Poison Information Helpline: 24 h)
Customer Service: +27 016 987 8787 (Dyna Fog Africa Sales and Technical Information: Monday - Friday, 08:00 - 17:00)

2. HAZARDS IDENTIFICATION

Classification of the substance or mixture

Not a hazardous mixture according to Regulation (EC) No.1907/2006.

Label elements

Hazard pictograms: No symbols.
Signal word: No signal word.
Hazard statements: No statements.
Precautionary statements: No statements.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Mixture

Description: A mixture containing of propylene glycol.
Dangerous components: Substances within this mixture are not hazardous according to Regulation (EC) No.1907/2006.

4. FIRST-AID MEASURES

Description of first aid measures

General advice: If medical advice is needed, have the product container or label at hand. If symptoms develop or persist, get medical help.
First-aid responders: First-aid responders should pay attention to self-protection and use the recommended personal protective equipment when the potential for exposure exists (refer to section 8).
After inhalation: If vapours or mists have been inhaled, move the person to fresh air, away from the immediate source of exposure. Loosen any tight clothing, if worn. Keep the person warm, at rest and under observation. If the person is not breathing, call an ambulance, then give artificial respiration. If breathing is difficult or irregular, administer oxygen.

SAFETY DATA SHEET

according to Regulation (EC) No.1907/2006

SANICARRIER

Version 1 - Revision: 01.07.2022 - page 2 of 7

After skin contact:	In case of contact with skin, rinse affected areas gently and thoroughly with neutral, non-abrasive soap and running water.
After eye contact:	In case of contact with eyes, rinse cautiously with large amounts of running water for at least 20 minutes, while holding eyelids apart. Remove contact lenses, if presented and easy to do. Continue rinsing.
After ingestion:	If the product has been swallowed, rinse the mouth out. Do not leave the person unattended. If vomiting occurs, have the person lean forward. Never give anything by mouth to an unconscious person.

Most important symptoms and effects, both acute and delayed

The effects of exposure (inhalation, skin contact or ingestion) to the substance may be delayed.

Indication of any immediate medical attention and special treatment needed

There is no specific antidote available. Treat symptomatically and supportively.

5. FIREFIGHTING MEASURES

Extinguishing media

Suitable extinguishing media: Fine sprays, carbon dioxide (CO₂), alcohol-resistant foam and dry chemical powder.
Unsuitable extinguishing media: Water jets.

Special hazards arising from the substance or mixture

May produce acrid smoke, fumes or mists on combustion.

Advice for firefighters

Protective equipment: Firefighters and other personnel who may be exposed should wear positive pressure self-contained breathing apparatus (SCBA) and liquid tight chemical protective clothing (LTS) in combination with fire kits, firefighter gloves and firefighter footwear, especially when fighting a large fire.

Protective actions: Do not breathe fumes or vapours. Evacuate the surrounding area and keep unnecessary and unprotected personnel away. Ventilate confined areas before entering. Contain the fire if properly trained and equipped. Use extinguishing measures that are appropriate to the type of fire, local circumstances and surrounding environment. Fight fire from a safe distance, from an upwind, uphill and/or upstream position. Water spray may be used to cool unopened containers exposed to heat but avoid water coming in contact with the product. Remove undamaged containers from the site if it is safe to do so. If a leak or spill has not ignited, use water spray to disperse vapours and to protect people stopping the leak. Contain fire control materials for later disposal and avoid their release to the aquatic environment, keeping them out of sewers, watercourses and drinking water supplies. If risk of water pollution occurs, notify appropriate authorities. Clean all contaminated clothing before re-use.

Emergency Action Code (EAC): Not applicable

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment, and emergency procedures

Personal precautions: Avoid contact with skin and eyes. Avoid inhalation of vapours and mists. Do not touch contaminated surfaces or walk into spilt material.

Non-emergency personnel: Do not attempt to act without training. Keep unnecessary and unprotected personnel away. Notify emergency responders and leave the area.

Emergency responders: Keep unnecessary and unprotected personnel away. Remove all ignition sources. Provide adequate ventilation, especially in confined areas. Wear protective gloves, protective clothing, eye protection, face protection and respiratory protective equipment. Suitable fabrics include impervious cotton, cotton blends and PVC.

Environmental precautions

Application: Do not apply directly to water, or to areas where surface water is present. The use of this chemical in areas where soils are permeable, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

SAFETY DATA SHEET

according to Regulation (EC) No.1907/2006

SANICARRIER

Version 1 - Revision: 01.07.2022 - page 3 of 7

Spillages: Prevent spilled material from entering waterway and sewer systems. Collect and dispose of dyke materials (e.g. dry sand, containment oil, etc.) in with local regulations. Notify appropriate authorities immediately if large spillages have contaminated surface water, drains, watercourses, sewer systems, or groundwaters.

Methods and materials for containment and cleaning up

Containment: For large spills, suppress vapours, or mists with a water spray jet. If it is safe to do so, prevent further leakage or spillage by stopping the flow of the product. To prevent the product from spreading over a wide area or into the environment, seal surrounding drains and contain the leakage or spillage using inert materials. If dyked material can be recovered, store it in a sealed waste container for subsequent disposal. Remove containers from the area as soon as possible. Clean contaminated objects and floors thoroughly, observing environmental regulations. Local authorities should be advised if significant spillages cannot be contained.

Cleaning-up: Soak up small spillages with inert absorbent material (e.g. cloth, fleece, dry sand, sawdust, etc.) immediately. Clean the surface thoroughly to remove residual contamination. Never reuse or return spills to original containers. Collect, store, and dispose of contaminated materials properly.

Reference to other sections

For information regarding safe handling, refer to section 7. For information regarding individual protection measures, refer to section 8. For information regarding waste disposal, refer to section 13.

7. HANDLING AND STORAGE

Precautions for safe handling

Recommendations: Do not handle until all safety precautions have been put in place. Wear protective gloves, protective clothing, eye protection, face protection and respiratory protective equipment. Avoid contact with skin and eyes. Avoid inhalation of vapours and mists. Handle and open containers with care to avoid spills, waste, and release to the environment. Keep containers tightly closed when not in use. Do not reuse empty containers. Applicators must refer to the directions of use on the product's label. For further advice, contact the registration holder.

General hygienic measures: Do not eat, drink or smoke whilst handling this product. Wash hands immediately after handling this product and before eating, drinking, smoking, or using the toilet. Remove clothing and personal protective clothing equipment before leaving the working area.

Conditions for safe storage, including any incompatibilities

Storage conditions: Store in a cool, dry and well-ventilated place. Keep in the original labelled container. Keep containers upright and tightly closed. Prevent containers from freezing and from physical damage. Keep out of reach of unauthorized persons, children, or animals. Store in such a manner as to prevent cross-contamination. Bund storage facilities to prevent soil and water pollution in the event of spillage. The storage area floor should be leak-tight, jointless and not absorbent.

Conditions to avoid: Do not store under direct sunlight. Do not store close to incompatible materials, food, animal feeding stuff, fertilizers, pharmaceuticals, cosmetics, or water supplies.

Packaging materials: High-density polyethylene (HDPE).

Incompatible substances: Explosives, flammable gases, flammable liquids, flammable solids, pyrophoric liquids, pyrophoric solids, strong oxidizing liquids, strong oxidizing solids, self-reactive substances and mixtures, self-heating substances and mixtures, substances and mixtures which in contact with water emit flammable gases, organic peroxides and desensitised explosives.

Specific end uses(s)

Solvent and surfactant agent: Adjuvant for producing fog and ULV misting solutions.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

These precautions are suggested for conditions where the potential for exposure exists. Emergency conditions may require additional precautions. Comply with occupational safety, environmental, fire and other applicable local regulations.

SANICARRIER

Version 1 - Revision: 01.07.2022 - page 4 of 7

Control parameters

Legal basis	Components	CAS-No.	Control parameters
EFSA	Propylene glycol	57-55-6	ADI: 25 mg/kg bw/day
REACH	Propylene glycol	57-55-6	DNEL (workers, inhalation) – systemic effects, long term: 168 mg/m ³ DNEL (workers, inhalation) – local effects, long term: 10 mg/m ³ DNEL (general population, inhalation) – systemic effects, long term: 50 mg/m ³ DNEL (general population, inhalation) – local effects, long term: 10 mg/m ³ DNEL (workers and general population, inhalation) – systemic and local effects, short term: No hazard identified DNEL (workers and general population, dermal) – systemic and local effects, long and short term: No hazard identified DNEL (general population, oral) – systemic effects, short term: No hazard identified DNEL (workers and general population, eyes): No hazard identified

Additional information: For the full wording of abbreviations, refer to section 16. Monitoring of the concentration of substances in the workplace may be required to confirm compliance with OEL and the adequacy of exposure controls.

Exposure controls

Appropriate engineering controls

Eyewash stations and safety showers should be available in the vicinity of use or handling. Provide adequate ventilation or other engineering controls to keep the airborne concentrations of vapours and mist below the applicable workplace exposure limits indicated above, especially in confined areas.

Individual protection measures

- General hygienic measures: Do not eat, drink or smoke whilst handling this product. Wash hands and face immediately after handling this product. Use appropriate degowning techniques to remove potentially contaminated clothing. Wash contaminated clothing and personal protective equipment before reuse. Contaminated work clothing should not be allowed out of the workplace. Dispose of clothing and other absorbent materials that have been drenched or heavily contaminated with this mixture in accordance with local regulations.
- Eye/face protection: Wear tight-fitting, chemical splash goggles, face shield or other full-face protection to prevent eye and face contact with vapours, mists or splashes.
- Hand protection: Wear chemical-resistant, impervious gloves with a minimum thickness of 5 mm. Nitrile rubber gloves may be used.
- Respiratory protection: Where exposure through inhalation may occur, wear a full-face mask, half mask or quarter mask respirators with replaceable filter cartridges. N95, R95, or P95 filters may be used.
- Body protection: Wear appropriate chemical-resistant overalls, footwear, and socks. Additional body garments should be used based on the task being performed, e.g. PVC rain suits for chemical loading, off-loading, or dilution.

Environmental exposure controls

Keep containers tightly closed when not in use. Avoid release to the environment.

9. PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

Physical state:	Liquid
Aspect:	Colorless
Colour:	Odorless
Odour:	Not available
Melting point/freezing point:	Not available
Boiling point/boiling range:	Not available

SAFETY DATA SHEET

according to Regulation (EC) No.1907/2006

SANICARRIER

Version 1 - Revision: 01.07.2022 - page 5 of 7

Flammability:	Not flammable
Ignition temperature:	Not available
Explosive properties:	Not explosive
Explosion limits:	Not available
Flash point:	Not available
Auto-ignition temperature:	Not applicable
Decomposition temperature:	Not available
pH-value:	Not available
Viscosity:	Not available
Solubility in/miscibility with water:	Miscible with water
Segregation coefficient (n-octanol/water):	Refer to section 12 for information on the ingredients of the mixture
Vapor pressure:	Not available
Density:	Not available
Vapour density:	Not available

10. STABILITY AND REACTIVITY

Reactivity:	No data available.
Chemical stability:	Chemically stable under standard use and storage conditions.
Possibility of hazardous reactions:	May react with pyrophoric liquids, pyrophoric solids, strong oxidizing liquids, strong oxidizing solids, self-reactive substances and mixtures, self-heating substances and mixtures, substances and mixtures which in contact with water emit flammable gases, organic peroxides and desensitised explosives.
Conditions to avoid:	Excessive heating.
Incompatible materials:	Explosives, flammable gases, flammable liquids, flammable solids, pyrophoric liquids, pyrophoric solids, strong oxidizing liquids, strong oxidizing solids, self-reactive substances and mixtures, self-heating substances and mixtures, substances and mixtures which in contact with water emit flammable gases, organic peroxides and desensitised explosives.
Hazardous decomposition products:	May produce acrid smoke, fumes or mists on combustion.

11. TOXICOLOGICAL INFORMATION

Information on toxicological effects

Propylene glycol

Acute oral:	LD50 - rat: 22000 mg/kg bw
Acute dermal:	LD50 - rat: 2000 mg/kg bw
Acute inhalation:	LC50 - rat: 44.9 mg/L air
Skin corrosion/skin irritation:	Human: No adverse effect observed (not irritating)
Serious eye damage/eye irritation:	Rabbit: No adverse effect observed (not irritating)
Respiratory irritation/corrosion:	Human: No adverse effect observed (not irritating)
Skin sensitization:	Human: No adverse effect observed (not sensitizing)
Germ cell mutagenicity:	Salmonella typhimurium: No adverse effect observed (non-mutagenic)
Carcinogenicity:	Rats: No adverse effect observed (not carcinogenic)
Reproductive toxicity:	NOAEL - mouse: 10100 mg kg bw/day
STOT – single exposure:	No data available
STOT – repeated exposure:	NOAEL - rat: 1700 mg kg bw/day
Aspiration hazard:	No data available

Information on other hazards

Endocrine-disrupting properties: Substances of the mixture are not identified as having endocrine-disrupting properties.

12. ECOLOGICAL INFORMATION

Toxicity

Propylene glycol

Fish:	LC50 (96h) - <i>Oncorhynchus mykiss</i> (rainbow trout): 40613 mg/L
Aquatic invertebrates:	LC50 (48h) - <i>Ceriodaphnia dubia</i> (water flea): 18340 mg/L

SAFETY DATA SHEET

according to Regulation (EC) No.1907/2006

SANICARRIER

Version 1 - Revision: 01.07.2022 - page 6 of 7

Algae and cyanobacteria:	EC50 (72h) - <i>Pseudokirchnerella subcapitata</i> (microalga): 19000 mg/L
Earthworms:	No data available
Birds:	No data available
Bees:	No data available

Persistence and degradability

Propylene glycol

Hydrolysis:	No data available
Biodegradation in water:	Readily biodegradable in freshwater
Biodegradation in water sediments:	No data available
Biodegradation in soil:	No data available
Adsorption/desorption:	Koc: 2.9 at 20 °C
Henry's law constant:	H: 0.006 Pa m ³ /mol at 12 °C

Bioaccumulative potential

Propylene glycol

Segregation coefficient (n-octanol/water):	Log Kow: -1.07 at 20.5 °C, pH 6.2 - 6.4
Bioconcentration factor:	BCF – aquatic species: 0.09

Mobility in soil

No mobility studies are available for propylene glycol.

13. DISPOSAL CONSIDERATIONS

Waste treatment methods

Residues disposal

Protective measures:	The safety precautions applied to the handling of the product shall be considered when disposing of residues. For further details, refer to section 7.
Method:	Do not burn residues. Do not dispose of residues with normal waste, or to sewer systems. Surplus product, rinse water or any residue which cannot be used according to label instructions shall be properly disposed of according to local regulations.
Recommendations:	To reduce the problems associated with the disposal of chemicals, consider purchasing quantities limited to the amounts needed in each season. Prepare only as much product as needed at each application, following the instructions of use.

Container disposal

Protective measures:	Care should be taken when handling empty containers that have not been thoroughly cleaned or rinsed out. Empty containers may retain vapours and product residues. Do not pressurize, cut, weld, braze, solder, drill or grind containers that were not thoroughly rinsed or cleaned.
Method:	Do not burn empty containers. Do not reuse empty containers for any other purpose. Do not dispose of contaminated containers in normal waste. Used containers shall be closely secured and stored until they can be safely disposed of. If possible, triple rinse or pressure rinse contaminated containers. If recycling facilities are available, deliver decontaminated containers to the designated collection point. If recycling facilities are not available, puncture, break or crush decontaminated containers to avoid reuse and provide appropriate disposal in accordance with local regulations.

Sewage disposal

Do not wash or dispose of untreated waste, spillages, residues or product surplus into sewers or water systems.

Other disposal recommendations

The generation of waste should be minimised or avoided wherever possible. If uncertain of local requirements, contact the proper environmental authorities for information on waste disposal in your area.

14. TRANSPORT INFORMATION

SAFETY DATA SHEET

according to Regulation (EC) No.1907/2006

SANICARRIER

Version 1 - Revision: 01.07.2022 - page 7 of 7

Transport pictogram: Not applicable
UN Number or ID number: Not applicable
UN proper shipping name: Not applicable
Transport hazard class(es): Not applicable
Packaging group: Not applicable
Environmental hazards: Not applicable
Maritime transport in bulk: Not applicable

15. REGULATORY INFORMATION

Safety, health, and environmental regulations/legislation specific for the substance or mixture

National regulations: In compliance with Occupational Health and Safety Act (85/1993): Regulations for Hazardous Chemical Agents, 2021, published by Government Notice No. 11263 (Government Gazette No. 44348) on 29 March 2021.
Other regulations: In compliance with Regulation (EC) No.1907/2006 of the European Parliament and of the Council on 18 December 2006.
Reference documents: Globally Harmonized System of Classification and Labelling of Chemicals (GHS), 2021. Dangerous Goods Emergency Action Code List (TDG), 2021

Chemical safety assessment

For this product, a chemical safety assessment was not carried out.

16. OTHER INFORMATION

Revisions

Version	Date issued	Updates
1	01.07.2022	GHS classification and labelling of chemicals compliance.

Full text of abbreviations of control parameters listed

ADI Acceptable Daily Intake
DNEL Derived No-Effect Level
EFSA European Food Safety Authority
REACH Registration, Evaluation, Authorisation and Restriction of Chemicals

Full text of abbreviations of toxicity and ecotoxicity reference values listed

EC50 Effective concentration estimated to produce a specific effect in 50% of the test organisms.
LC50 Lethal concentration estimated to cause the death of 50% of the test organisms.
LD50 Lethal dosage estimated to cause the death of 50% of the test organisms.
NOAEL No observed adverse effect level.

Disclaimer

Each user should read this Safety Data Sheet (SDS) and consider the safety precaution recommended. This SDS summarises the present state of our knowledge about the health and safety hazard information and the safe handling and use of the product and is to be used for this product only. The information was obtained from sources which we believe are reliable and is provided in good faith, but do not purport to be all-inclusive and shall be used only as a guide. It does not represent any guarantee of the properties of the product. The conditions or methods of handling, storage, use or disposal of the product are beyond our control and for this reason, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of the product.
